Channel Tools in partnership with EPT

Turning data into
immutable and
unhackable proof

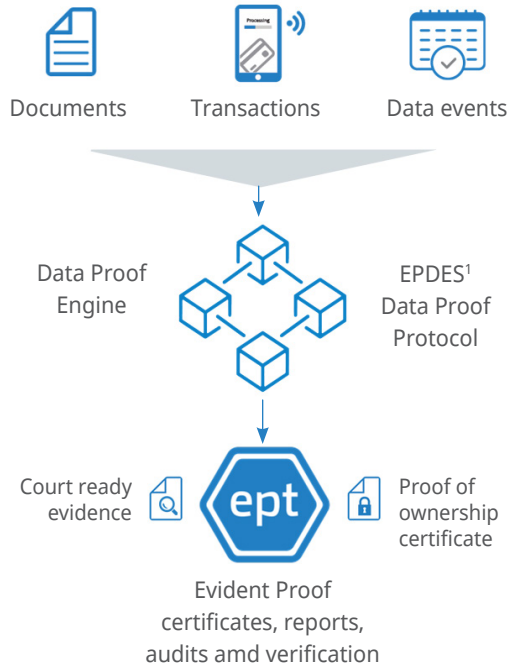

THE TRUTH WE TRUST

Evident Proof turns data, documents, processes and transactions into immutable, unhackable, proof and provenance chains for ISV's.

Compliant with EU and worldwide data standards Evident Proof generates proof certificates and court-ready evidence certificates that enable clients to:

- REDUCE RISK
- ENHANCE REVENUE STREAMS
- SOLVE DISPUTES
- VERIFY DATA EVENTS

with
100%
accuracy

Why integrate with the Evident Proof Platform?

Reducing risk for businesses, directors and management. Evident Proof is a 'plug-in' tool that reduces risk and enhances data compliance. Clients can generate 100% verifiable proof and court-ready evidence, of any data event or workflow, in new and existing platforms and applications. This enables our partners to improve data processes and offer a fully data compliant service to their clients.

Ease of Deployment

The Cloud-based Immutable Proof As A Service software (IPAAS) can be up and running within a few minutes of client registration.

We offer a monthly usage-based pricing structure.
